SUBJECT INDEX TO VOLUME 64

Propagation and transmission in homogeneous media

Analysis of systematic errors in the dynamic zone-plate interferometer, T. Shimano, N. Ohyama, J. Tsujiuchi and T. Honda 64 (1987) 1
New line integral expressions for Fraunhofer diffraction, N. Saga 64 (1987) 4
A space–time modulated field with specular coherence function, P. De Santis, F. Gori, G. Guattari and C. Palma 64 (1987) 9
Application of spatial filtering in thermal lensing detection, J. Słaby 64 (1987) 89
Generalized light rays: ray dispersion, dark rays and statistical inhomogeneity, R. Simon 64 (1987) 94
A laser velocimeter using a random pattern, Y. Aizu, K. Ogino and T. Asakura 64 (1987)205
Electronic moiré deflectometry, D.K. Sharma and C. Delisle 64 (1987)211
Transmission of gaussian pulses through a spatially dispersive semiconducting film, J.A. Gaspar-Armenta and P. Halevi 64 (1987)217
White light interferometer for real time phase pseudocoloring, R.D. Torroba and R. Arizaga 64 (1987)221
Modal expansion for J_0-correlated Schell-model sources, F. Gori, G. Guattari and C. Padovani 64 (1987)311
Quantum theory of the lossless beam splitter, H. Fearn and R. Loudon 64 (1987)485
Bessel–Gauss beams, F. Gori, G. Guattari and C. Padovani 64 (1987)491
Second-order coherence properties of beams generated by a generalized Schell-model source, M. Zahid and M.S. Zubairy 64 (1987)496
Real-time comparative digital speckle pattern interferometry, A.R. Ganesan, C. Joenathan and R.S. Sirohi 64 (1987)501

Optical information, image formation and analysis, optical computing

Colour image recording using thermoplastic photoconductor material, A. Handojo, E. Wihardjo, T. Honda and J. Tsujiuchi 64 (1987) 15
Diffraction regimes of phase gratings, T. Jaaskelainen and T. Hytonen 64 (1987) 19
Analysis of carrier procedures for discrete halftoning, D. Just and O. Bryngdahl 64 (1987) 23
Energy transfer in $Sr_{0.56}Ba_{0.44}Nb_2O_6$:Ce at 633 nm, W.-H. Liu, Y.-S. Qiu, H.-J. Zhang, J.-H. Dai, P.-Y. Wang and L.-Y. Xu 64 (1987) 81
Fast parallel optical digital multiplication, Y. Li, G. Eichmann and R.R. Alfano 64 (1987) 99
On the use of the Hopfield model for optical pattern recognition, J.S. Bayley and M.A. Fiddy 64 (1987)105
A multichannel optical correlator, F.T.S. Yu and Q.H. Zhou 64 (1987)111
Real-time noncoherent correlator using liquid crystal television, S. Jutamulia, T.W. Lin and F.T.S. Yu 64 (1987)115
Phase-only filter as matched spatial filter with enhanced discrimination capability, K. Chałasińka-Macukow and T. Nitka 64 (1987)224
Narrow slit aperture white light speckle photography for non destructive testing, N. Krishna Mohan, C. Joenathan and R.S. Sirohi 64 (1987)229
Nonlinear relaxation of vibrationally highly excited freon molecules, O.V. Achasov, R. Bruzzese, C. de Lisio and S. Solimeno 64 (1987)234

Beam coupling in volume holograms recorded with $N+1$ plane waves, J. Goltz and T. Tschudi 64 (1987)239
Application of the maximum entropy method to microwave Fresnel imaging, J.C. Jackson 64 (1987)242
Reading volume gratings under the Bragg angle, J. Marots and K.H. Ringhofer 64 (1987)245
Computer generated holograms constructed with slanted fringes, A. Saukkonen, J. Tolvanen and R. Silvennoinen 64 (1987)317
Noncollinear second-harmonic-generation-based ultrafast optical signal processing for optical digital computing, Y. Li, G. Eichmann, X. Luo, P.P. Ho and R.R. Alfano 64 (1987)322
Tomographic reconstruction with diminished informational content, D.V. Pantelić 64 (1987)327
Efficient method of support reduction, B.J. Brames 64 (1987)333
A new approach to read volume holograms at different wavelengths, H.C. Külich 64 (1987)407
Real time optical logic processing, X. Yang, K. Chin and M. Wu 64 (1987)412
Discrimination sensitivity of the extended optical correlator, N. Demoli and D. Vukičević 64 (1987)417
Optical computation of determinants, D.V. Pantelić 64 (1987)421
Optical tomographic memory, D.V. Pantelić 64 (1987)507

Optical communications

Effects of absorption on the propagation constants of guided modes in an asymmetric slab optical waveguide, S. Miyanaga and H. Fujiwara 64 (1987) 31
Digital transmission on electric subcarriers in optical fiber videocommunication systems, J. le Ber and M. le Ligne 64 (1987)120
Asymmetric switch response of three-arm directional couplers in Ti:$LiNbO_3$, R.R.A. Syms 64 (1987)248
Cut-off rate performance for phase shift keying modulated coherent states, C.W. Helstrom, M. Charbit and C. Bendjaballah 64 (1987)253
Recent developments in the production of narrowband position tuned interference filters for wavelength multiplexed optical fibre systems, D.J. McCartney, P.H. Lissberger and A.K. Roy 64 (1987)338
Saturation of guided wave index with power in nonlinear planar waveguides, M. Romagnoli and G.I. Stegeman 64 (1987)343
Computer analysis of general nonlinear planar waveguides, K. Ogusu 64 (1987)425

Atomic and molecular physics

Infrared optogalvanic effects in xenon, R.D. May 64 (1987) 36
Rabi oscillations and adiabatic rapid passage measured in the 2s–3p transition of atomic hydrogen, V. Lorent, W. Claeys, A. Cornet and X. Urbain 64 (1987) 41
Collective jumps in a system of three-level atoms, A.S. Shumovsky, R. Tanas and T. Quang 64 (1987) 45
Isotope shifts in ^{91}Zr from optogalvanic saturation spectroscopy, G. Chevalier, J.M. Gagné and P. Pianarosa 64 (1987)127
Search for gain on the NaHg A-X excimer transition, J. Schlejen, C.J. Jalink and J.P. Woerdman 64 (1987)131
Light-induced drift in rubidium: spectral dependence and isotope separation, A.D. Streater, J. Mooibroek and J.P. Woerdman 64 (1987)137
Double optical resonance at high pressure: collisional broadening and Doppler effects on ac Stark splitting, A.M.F. Lau 64 (1987)144
The possibility of deep laser focusing of an atomic beam into the Å-region, V.I. Balykin and V.S. Letokhov 64 (1987)151

A ring gas laser as a quantum mechanical detector of a cooperative interaction of a radiation field with an active medium, V.F. Cheltsov 64 (1987)347
Spectrum of squeezing in collective resonance fluorescence, N.N. Bogolubov Jr., A.S. Shumovsky and T. Quang 64 (1987)351
Very numerous rovibrational levels of tellurium vapor ($^{130}Te_2$) induced laser transitions, P. Dupré 64 (1987)431
Optically pumped far-infrared laser theory based on the dressed-atom (molecule) approach, C.-X. Wang, R.-W. Wang and E.-S. Fu 64 (1987)437
Stimulated resonance Raman spectroscopy of the fine structure in H_2 $c^3\Pi_u^-$, N. Bjerre and E. Riis 64 (1987)513
An electrodynamic theory for the emission of fluorescence polarization by solutions, E. Collett 64 (1987)516
Absorption spectrum of a two-level system in a squeezed vacuum, H. Ritsch and P. Zoller 64 (1987)523

Condensed matter

Optical rotatory power in crystals of the mercurous halides and tellurium dioxide, K.A. McCarthy, A.P. Goutzoulis, M. Gottlieb and N.B. Singh 64 (1987)157
Transmission of gaussian pulses through a spatially dispersive semiconducting film, J.A. Gaspar-Armenta and P. Halevi 64 (1987)217
Measuring the coefficient of the thermal conductivity of aluminium with a laser, W.Z. Zhou 64 (1987)256
Lifetime of F_2 and F_3^+ centers in LiF crystals doped with magnesium, T. Kurobori, Y. Imai and N. Takeuchi 64 (1987)259
Ground state and singlet excited state of laser dye DCM: dipole moments and solvent induced spectral shifts, M. Meyer and J.C. Mialocq 64 (1987)264
Light propagation along the helix of chiral smectics and twisted nematics, I. Abdulhalim 64 (1987)443
The time-dependence of the growth of thin organic liquid layers on a gold surface, studied by surface-plasmon polariton techniques, J.D. Pollard and J.R. Sambles 64 (1987)529

Plasmas

Light pressure induced modulations in a plasma, Y. Ben-Aryeh, P. Mulser and H. Hora 64 (1987)269

Lasers

Influence of coexisting attractors on the dynamics of a laser system, H.G. Solari, E. Eschenazi, R. Gilmore and J.R. Tredicce 64 (1987) 49
Instabilities in a three-level coherently pumped laser, J.C. Ryan and N.M. Lawandy 64 (1987) 54
Note on the design of electrode profiles for discharge lasers, T. Hermsen 64 (1987) 59
Performance characteristics of a synchronously pumped LiF:F_2^+ colour centre laser, N. Langford, K. Smith and W. Sibbett 64 (1987)274
Cavity considerations in hybridly mode-locked femtosecond dye lasers, K.S. Budil, I.A. McIntyre and C.K. Rhodes 64 (1987)279
KrF-laser without buffer gas excited in a capacitively coupled discharge tube, J. de la Rosa and H.-J. Eichler 64 (1987)285
Validity of mode splitting analysis in optically pumped molecular lasers having Rabi splitting, J.S. Uppal, R.G. Harrison and J.V. Moloney 64 (1987)357
Flashlamp pumped colour centre lasers in LiF and NaF, J.L. Doualan 64 (1987)362

SYN-dioxabimanes as laser dyes I, T.G. Pavlopoulos, J.H. Boyer, I.R. Politzer and C.M. Lau 64 (1987)367
Very numerous rovibrational levels of tellurium vapor ($^{130}Te_2$) induced laser transitions, P. Dupré 64 (1987)431
Optically pumped far-infrared laser theory based on the dressed-atom (molecule) approach, C.-X. Wang, R.-W. Wang and E.-S. Fu 64 (1987)437
Influence of colliding pulses on the chirp production of a saturable absorber, W.B. Jiang, D.C. Sun and F.M. Li 64 (1987)449
A band-model for dye lasers and the low threshold of the second instability, F. Hong and H. Haken 64 (1987)454
Phenylbenzimidazole proton-transfer laser dyes: spectral and operational properties, A. Costela, F. Amat, J. Catalán, A. Douhal, J.M. Figuera, J.M. Muñoz and A.U. Acuña 64 (1987)457
Pressure tuned single longitudinal mode dye laser, O.L. Bourne and D.M. Rayner 64 (1987)461
A new cw FIR lasing medium: methyl fluoroform, M. Fourrier and M. Redon 64 (1987)534
Allowed detuning range of the third order laser theory for an inhomogeneously broadened laser, W.R. Christian and L. Mandel 64 (1987)537
Excimer laser pumped distributed feedback dye laser, J. Hebling 64 (1987)539

Nonlinear optics

Nearly degenerate four-wave mixing in photorefractive crystals, an analytical treatment, J. Goltz, F. Laeri and T. Tschudi 64 (1987) 63
Investigation of the Raman wavefront of higher order gaussian-Hermite modes, X. Cheng, R. Wang, Q. Lou and Z. Wang 64 (1987) 67
Polarization investigation of relaxation of medium excitation by the method of delay of light ultrashort pulses, V.M. Arutunyan, A.Zh. Muradyan and L.S. Petrosyan 64 (1987) 72
Polarization wavefront conjugation by means of transient holograms in rigid dye solutions, L. Nikolova, K. Stoyanova, T. Todorov and V. Tatanenko 64 (1987) 75
Energy transfer in $Sr_{0.56}Ba_{0.44}Nb_2O_6$:Ce at 633 nm, W.-H. Liu, Y.-S. Qiu, H.-J. Zhang, J.-H. Dai, P.-Y. Wang and L.-Y. Xu 64 (1987) 81
Low-power optical bistability and phase conjugation in polydiacetylene, W. Blau 64 (1987) 85
Real-time contrast reversal via four-wave mixing in nonlinear media, P. Yeh and A.E.T. Chiou 64 (1987)160
A femtosecond all-fibre compressor, A.S. Gouveia-Neto, A.S.L. Gomes and J.R. Taylor 64 (1987)163
Low threshold instabilities in unidirectional ring lasers, L.A. Lugiato, F. Prati, D.K. Bandy, L.M. Narducci, P. Ru and J.R. Tredicce 64 (1987)167
Stable localization of atoms in a standing light wave field, V.G. Minogin and Yu.V. Rozhdestvenskii 64 (1987)172
Dispersive optical bistability in a PbSnSe etalon at room temperature, J.J.E. Reid, A.K. Kar, H.A. MacKenzie, R. Grisar and H.M. Preier 64 (1987)175
Optical hysteresis and multistability in a double resonator system with an additional feedback, G.P. Golubev, D.G. Luchinskii, A.L. Velikovich and M.A. Liberman 64 (1987)181
Intermodal correlations in the generation of higher harmonics, M. Kozierowski 64 (1987)186
Conical diffraction in $LiNbO_3$:Fe crystal, W.-H. Liu, F.-Z. Chen, Y.-S. Qiu and T.-S. Lu 64 (1987)191
The solution of the Fokker-Planck equation with zero or negative diffusion coefficients in quantum optics, W. Tan, Y. Li and W. Zhang 64 (1987)195
Measuring the phase of slow Kerr-type nonlinearities: the role of phase modulation, F. Hache, P. Roussignol, D. Ricard and C. Flytzanis 64 (1987)200
Optical nonlinearity in a nematic liquid crystal using surface plasmon-polaritons, R.A. Innes and J.R. Sambles 64 (1987)288

The fidelity of stimulated Brillouin scattering with weak aberrations, L.P. Schelonka 64 (1987)293
Propagation characteristics of elliptical dielectric waveguides: ray-optic approach, J. Wang and S. She 64 (1987)297
Polarisation optical bistability in nematic liquid crystals, A.D. Lloyd 64 (1987)302
Nondegenerate phase conjugation with no pump spatial holes, S. An, B.A. Capron and M. Sargent III 64 (1987)307
Saturation of guided wave index with power in nonlinear planar waveguides, M. Romagnoli and G.I. Stegeman 64 (1987)343
Spectrum of squeezing in collective resonance fluorescence, N.N. Bogolubov Jr., A.S. Shumovsky and T. Quang 64 (1987)351
Picosecond stimulated Raman scattering in P_2O_5–SiO_2 based single mode optical fiber, A.S.L. Gomes, V.L. da Silva, J.R. Taylor, B.J. Ainslie and S.P. Craig 64 (1987)373
On large statistical fluctuations in a two-mode laser with an injected signal, V.S. Smirnov and A.Z. Fazliev 64 (1987)379
Experimental study of the evolution of chirped soliton pulses in single mode optical fibres, A.S. Gouveia-Neto, A.S.L. Gomes and J.R. Taylor 64 (1987)383
Nonlinear refraction in silicon induced by one-micron picosecond pulses, T.F. Boggess, K. Bohnert, D.P. Norwood, C.D. Mire and A.L. Smirl 64 (1987)387
Threshold measurements of stimulated Raman scattering in gases using picosecond KrF laser pulses, N.J. Everall, J.P. Partanen, J.R.M. Barr and M.J. Shaw 64 (1987)393
Chirping of femtosecond light pulses passing through a four-level absorber, V. Petrov, W. Rudolph and S. Wilhelmi 64 (1987)398
Raman induced phase conjugation in benzene derivatives, D.S. McCallum, M.H.R. Hutchinson and R.S. Adrain 64 (1987)403
Rotational Raman gain suppression in H_2, M.D. Duncan, R. Mahon, L.L. Tankersley and J. Reintjes 64 (1987)467
Transient response of an electrically addressable nonlinear bistable optical device, J. Staromlynska and R.A. Clay 64 (1987)474
Experimental determination of the 2s–4d two-photon transition probability in lithium, B. Schunke and H.-J. Kunze 64 (1987)481
Absorption spectrum of a two-level system in a squeezed vacuum, H. Ritsch and P. Zoller 64 (1987)523
Stimulated Brillouin scattering excited by a multimode laser in single-mode optical fibers, E. Lichtman and A.A. Friesem 64 (1987)544
Properties of a good cavity laser with swept losses, P. Mandel 64 (1987)549
Optical quantum nondemolition detection schemes in $\chi^{(2)}$ media, R.M. Shelby and M.D. Levenson 64 (1987)553
